Extract of a letter from the seat of war, (com-municated to the Union.) dated Camp Butler, (ser-en miles west of Camargo,) September 4, 1846: We jest camp Twiggs on the 10th ultimo. On the 16th took up the line of march for Camargo, which place we reached on the 21st, and marched and encamped here on the 27th; and on the 6th, day after tomorrow, (Sunday,) we move forward to Cerralvo, a town some 70 miles from here, at the foot of the mountains, at which place it is deemed cur stay will be as short as has been the case here. Cerralvo is now occupied by Gan. Warth's concur atay will be as short as has been the case here. Cerralvo is now occupied by Gen. Worth's command, and is probably the last depot we will establish this side of the mountsins. The country from this point to Cerralvo is truly beautiful; water in abundance, and the inhabitants seem of a much better class than those whom we have met with on our passing the frontier border.

Mier is about fifteen miles from here, occupied

by a portion of our troops.

Yesterday the first United States infantry, and the battalion of volunteers from your city and Bal-timore passed up. They encamped with us during the heat of the day.

Company C of our regiment returned from Cer-

raive yesterday, having escorted a large train of wagons to and from that place. Brigadier General Twiggs and staff arrived at our camp on the 2d, and Major General Taylor and staff is expected on Saturday, the 5th, and will proceed next day to

It may not be uninteresting to inform you that the troops at this camp are four companies of dra-goons, Ridgeley's light artillery, Co. E 3d, and Co. K 1st artillery, the whole commanded by Cap-tain May. So you see we constitute the neisy (artillery) portion of our army. Many of our men have been taken sick, principally of fover, since our arrival at Camargo and this camp; although the number sick is certainly great, as yet no deaths have occurred.

e news from the interior, military or political must be sought after in the papers of the States; for here we know nothing of the movements of our foe, except through the papers of the States, which reach us in about 20 days under ordinary circum-

A thousand and one reports are in circulation as regards the state of the defences of Monterey and Saltillo; in all of which I place no reliance. their means were greatly curtailed by the recent losses of the battle of the 9th, and evacuation of the several towns, cannot be doubted; and if they did reserve resources at Monterey, I will then give them more credit than I am willing at present to admit to be their due.

We must have another blizzard at them. I think Saltillo will be the Rubicon; for if they do not fight us there, as a great portion of the volunteer force will, in all probability, be left on the line of our aupplies, which I am inclined to believe, after entering the passes of the mountains, will have to be supplied by the country, else the expense of transtation, and, I might add, the limited means o transportation, is such that the government would almost be compelled to make this a war of con-quest, to come out anything like even from the fight. Like two school boys, one received a black eye; the other, before his opponent can give him one, cries enough; so that the first, it will be admitted, al-

though victor, suffered most by the conflict.

In a philanthropic point of view, this war must be of advantage to Mexico. Many of the men, particularly among the volunteers, will settle in this country, as mechanics of all classes have every inducement. The short period our troops have been in the country has convinced these poor devils that by a little exertion, they can better their horrible condition. Hundreds of them are employed by our different departments as laborers, muleteers, &c., &c., for which they receive fair compensation .-But to return to the subject. If we do not have a fight at Saltillo, the Dons may bid farewell to the halls of the Montezumas;" for then, after having this strong hold in our possession, it can be made a depot to supply almost any force; therefore our march onward would not be retarded, by establishing depots every 60 or 100 miles, the country besupply the wants of the army, at least so far as the informtion of those who pretend to with those facts, can be relied on. ed to be acquainted

Our difficulties but now commence. Instead of wagons for the transportation of our supplies, we mules; but I expect after it is discovered that the routes are practicable for wagons, they will be again supplied as soon as they have completed hauling stores to our new depot.

A Severe Operation upon a Countryman.

On Wednesday afternoon a middle aged person from Westboro, in the employ of the Western Rail Road Company, received a check at the depot on the Roviston Bank for \$400, and as he wanted to get it cashed forthwith he was furnished with a note to that effect to an officer in the bank. He then went to the bank, and obtained the money, and when he came out he found at the door, a cabman, who must have overheard a conversation about go-ing to Charlestown, which he had been engaged in at the depot, for he at once said to him, "Hadn't you better ride over to Charlestown in my cab?" The countryman, after some demur, concluded to ride; and, after stopping in Commercial street, to some purchases, he went to Charlestown, and was there induced by the cabman to drink a glass of gin aling, the first drop of ardent spirits he had tasted for four years. His recollection of events after the visit to the tavern in Charlestown is very rague. He remembers that at one time there w a strange man and a woman in the cab with him; also, that he visited with them a drinking place near the city stables; and soon after the man and woman left the cab, he was dropped in State street, where he fell in with a watchman, about two, yesterday morning; and, upon looking for his money, he found a little roll of paper instead of his \$440.

FIRING OF THE MAMMOTH MORTAN CANNON The great gun lately cast at Alger's foundry, and described in the Post, was fired a few times at South Boston Point yesterday afternoon. Shells, 12 inches in diameter, and 180 pounds in weight. were thrown various distances, according to charge, elevation, and length of fuse used. V a charge of 20 pounds of powder, 20 seconds fuse, at an elevation of 22 degrees, a shell was thrown 2 1-2 miles, and buried deep in the earth at Squatum. A ricochet shot was tried with a 10 secon 20 pounds powder charge, and 7 pounds in shell. It dashed through and over the water at an awful rate, and exploded at a distance of bout two miles in the water, throwing the fragits several hundred yards in every direction Next week the gun will be tried with higher charges of powder. The regular service charge Next week the gun will be tried with nigher charges of powder. The regular service charge is 25 pounds, which, at a due elevation, will project the shell somewhere between 31-2 and 4 miles. Thus far all the previous calculations of the powers of the gun have been verified by the experiments. The firing was under the direction of Col. Removed the inventor of this transport. ments. The firing was under the direction of Col. Bomford, the inventor of this tremendously formidable species of ordnunce, intended for harbor defence.—Post.

Baston Post

The water in Connecticut River, at thi more than a foot below a spike that was drives 30 years ago at a point lower than the water had been for 30 years previous; consequently the River is now more than a fact lower than it has been during the past sixty years.—Hartford Times.

THE RATLEDAR .- The rails are down and the track rendy for the cars, to "Old Deerfield." The stone work of the bridge at Cheapside was completed last Wednesday, and the superatructure extends nearly or quite across the river. The prospect now is, that the cars will come to Greenfield in the course of a very few weeks. - Greenfield

VERMONT PHŒNIX.

Brattleboro, Thursday, Oct. 15, 1846.

Cattle Show and Fair of the Windham Co Agricultural Society, for 1846.

Wednesday and Thursday, October 7th and 8th The two days of the WINDHAM COUNTY CATTLE Snow and Fath, held the present year in this village, will long be remembered in Old Windham County. Nothing occurred to mar the pleasures of the day, and the meeting was characterized by great harmony of feeling, increased zeal in the great cause of Agriculture, and the best spirit among all classes assembled to witness the exhibi

The committee of arrangements are entitled t great credit for adopting and carrying out a system measures which have mainly contributed to effect these fortunate results. The arrangements were mostly conducted under the personal supervision of the able and indefatigable chairman of the Committee, Chus. Chapin, Esq. to whose efforts in conjunction with his associates, in carrying out the various arrangements, the public are greatly in-

The Farmers of Windham County have done themselves great honor by the splendid exhibition they have thus created; and the public spirited citizens of this village have shown even more than their wonted liberality and zeal, in every good work, in the promptness and extent to which they responded to the call of the managers, which the location of the Fair at this village rendered necessary. A generous hospitality exhibited itself among our citizens in throwing open their private mansions to accommodate the immense multitudes who poured in from all quarters to witness this great annual Farmers' Festival, and which the public Hotels were found utterly unable to account The ground occupied by the Society for the exhihition of stock was well located on the public common, in the north part of the village, embracing an extensive and picturesque view in the distance, of rich bottom lands and sunny hill sides, just such a view, indeed, as a farmer's eye would delight to rest upon.

The rush of citizen farmers with their wives and daughters, was astonishing, and an unabated interest seemed to exist to the last. A number of distinguished gentlemen were present from different parts of the County, and the appearance and the interest taken by such men in the cause of Agriculture, added much to the influence of the exhibi-

MEETING OF THE Society held its annual meeting at the Unitarian Church at 9 o'clock, A. M., where we understand the old officers of the Society were all reelected, with one or two exceptions.

Horses.- The show of Horses was respectable -quite as good, indeed, as at any previous exhibition of the Society. It was good both in numbers, and the general excellence of the animals exhibited. The Morgan Horse, owned by F. P. Sawyer, of this village, attracted much notice; and we regard his purchase as a great acquisition to the farming community of this County. The rapid action, spirited movements, and sprightly vigor of the Barton Horse, so called, owned by John L. Sargeant, of West Brattleboro, elicited much remark. We were surprised that a premium was not awarded to this Horse; but have learned that it was in consequence of a non compliance with some of the regulations of the Society. There were several pairs of beautiful matched Horses-among which we particularly noticed a splendid pair of Bays belonging to Lovell Farr, Esq. of this village; also another pair presented by Col. Hyde, of Bellows Falls, and a pair of elegant horses owned by J. R. Blake, Esq. of this village, and a splendid pair of bays presented by Thos. J. Holland, of Townshend. But to our fancy, the most elegant creature upon the ground was a bay, 3 years old medium sized colt, owned by Jacob Dunklee, Jr. of Payetteville The graceful movements of this colt attracted great attention. We should suppose from his color form, and action, that he was of the Morgan breed

CATTLE .- The show of Cattle was splendid, far exceeding any thing before exhibited in the County. 36 yoke of Working Oxen were entered for premium, and we doubt whether a richer display than these noble bullocks presented was ever witnessed in New England; and in this we are susfrom Franklin County, Mass. Among these were two yoke of red oxen, owned by James Joslyn, of Putney; a team of 8 pairs, owned by the Sargeant family, of West Brattleboro; a pair presented by Mr F. G. Davis, of Whitingham; also 8 pairs or more, presented by the Guilford farmers. Some 10 or 12 yoke of Fat Cattle were exhibited, and their mammoth size, beautiful symmetry, and fine proportions, excited great admiration. Old Deerfield has long carried off the palm in the fattening of oxen; but if the oxen which we saw furnish a fair list of the skill of our farmers in the breeding and fattening of cattle, the laurels of our neighbor, will yet wither before the superior efforts of the farmers of Old Windham. The display of steers, both two years old and yearlings, was very fineparticularly the steers presented by Messrs May of Westminster, Abel Wilson, Jr. of Putney, Hiram Smith, of Guilford, Presson Adams, of Newfane, Sumuel E. Wheat, of Putney, and Thos. J Holland, of Townshend; the exhibition of these animals, together with some two years old and yearling beifers presented by Messrs Lawton and Boyd of Wilmington, Chapin and Goodhne of this village, Gen. Kimball of Newfane, and Barnard Lynde of Guilford, furnished the most unerring evidence that the influence of this Society had thus far proved highly beneficial-stimulating our far-

mers to greater efforts in improving their stock. BULLS.-The show of Bulls was not so great a ast year. A large native bull presented by Mr Underwood, of Putney, took the first premiumthere being no competition. The blooded 2 year old bulls of Messrs Rand and Earl, were presented again this year. These beautiful animals have lost none of the favor with which they were viewed year ago, and so long as their superior symmetry continues as distinctly marked as at present, they will ever secure the popular favor. Duke, a full blooded, short hore, 20 months old, and weighing about 1400 lbs , was exhibited by Mesers Kimball Field and Merrifield, of Fayetteville. The deep massive frame and compact form of this bull exci ted universal admiration. His mottled color of red and white combined in endless variety, produced a most brilliant effect. In common with many of the most successful breeders in this county, we regard this bull as furnishing the most triumphant illustration of the value of this breed, and we are confident he presents a greater combination of per fections than any other bull of his age in New England.

cows exhibited by Messrs Blake and Lawrence of Harris & Scott, of Somerset.

light bone and offal.

Swing .- The exhibition of Swine was superiorko any thing we have before witnessed in the County. They were of the Suffolk breed, introduced into this County by Mr Stickney, of Boston; and their fine forms, connected with their well known good qualities, elicited much admiration. We noticed sow with an interesting family of pigs, from the Asylum, presented by Dr Rockwell.

DAIRY .- The samples of Butter and Cheese which were presented for premium, were very fine, but not so numerous as the show of last year -particularly in the article of butter. We need tured in Old Windham County.

from abroad.

HORTICULTURE AND GARDENING.—Of Garden PLOUGHING MATCH.—This came off at 3 o'clock

duce all lovers of a good garden to attempt its was watched with intense interest by the im credulous that for all the ordinary cultivated fruits, exercises for the first day closed. Old Windham County is after all the best in New England. We shall not here attempt a description of the different varieties at this time, but hope we bled at the Unitarian Church, when the re-ports

Tools and Farming Implements.-The exthe old triangular barrows in general use.

be wished. We were by no means surprised at the ing 123 bushels. lack of manufactures which we witnessed, when we reflected that the pursuits of our people are almost exclusively agricultural. This in a great measure accounts for the want of competition evinced in this branch of industry.

black cassimere, made by Mr James Keyes, of Put. that good cultivation will produce good crops. ney; and a still more beautiful piece of blue black cloth, manufactured by Mr A. N. Boyden of Guilford; also a piece of lion skin by the same. Highly finished air tight stoves and copper tea kettles were exhibited by J. H. & W. H. Esterbrook of this village. A beautiful and highly finished harness by Col. Miller of this village; also a superbly finished carriage by Mesara Field & Atkins of West Brattleboro. But we must confess we saw nothing which evinced so much skill in workmanship and finish as two sleighs exhibited by Mr Asa Miller of this village. We think we can safely challenge all the shops of New England to produce a more splendidly finished article than the single sleigh-the painting was so brilliant as to seem almost dazzling. The finish and embellishments were rich without being showy or tawdy-they excited universal admiration; and we regret that a want of care on the part of the manufacturer in complying with the regulations of and we hope our farmer's wives will yet learn the the society should have prevented his obtaining a truth of the Scotch proverb, that premium. We understand that many, from this cause, failed of receiving awards; which is the more ly fin ished pump made by John Burnham; hoots provided by our worthy friend Capt. Loan. and shoes from the shops of the Messrs. Frost; several specimens of book binding in our neighbo

means superior. We saw two beautiful short horn Messrs. Goodhues & Chapin, of this village, and

this village, but they were not presented for a pre- Household ARTS and FANCY ARTICLES.-In the department of household arts the display was by SHEER.—The display of Sheep was equal to any no means so extensive as last year—however, it was quite respectable. Our fair readers will exno means so extensive as last year-however, it seemed to attract the most attention were 3 bucks presented by Messra Crawford of Putney, and which were exhibited. We cannot omit to mention Campbell and Harlow of Westminster. We were however, the silk quits of Mrs. Wheeler of this vilmuch pleased with the appearance of 3 peax of fine, lage, and Mcs Shafter of Townshead; also, a cultwoolled ewes, exhibited by Mesers Harlow and co quilt of Mrs Lewis Lamb of Wilmington; two Campbell of Westminster, and Mr Samuel Wheat pieces of flannel, manufactured by Mrs Horace of Putney. There were two splendid coarse wool. Goodhue of Westminster, evincing great skill-a led backs presented by Messra Adams of Marlboro, piece of floor carpeting made by Mrs J. E. Higley and Moore of Dommerston. The pens of cossets of Wilmington, and a beautifully finished palm leaf presented by Messrs Surgeant of this town, Aldrich hat by Mrs Stilman Alvord of Wilmington ; a white of Westminster, and Kimbail of Nawfane, shew cotton spread by Mrs Jonathan Smith of this town, very fine breeding, great beauty of head and eye, elicited much praise-but to our fancy, nothing in with carcusses of the most perfect symmetry, and this department is deserving of more credit than the several pieces of fronking exhibited by Mrs Roberts and Wheat of Potney, Mrs Boyden of Guilford Mrs Harlow of Westminster, and Mrs Lamb of Wilmington; and last the not least, a beautiful piece of frocking manufactured and exhibited by Mrs Anna Foster of Putney-a lady S1 years of age. Or FANCY ARTICLES, the display was much more

extensive and shows. The gothic chairs presented by Miss Ellen Barnard of this village, were surpassingly heautiful; so also the screen by Miss Sarah F. Goodhue, who by the way, must be very assiduous with her needle, for she obtains a premi -particularly in the article of butter. We need any nothing more in this paragraph than that any larly pleased with two ottoman covers by Miss Jane one who witnessed the splendid display of cattle Woodcock of this village; also a specimen of raisone who witnessed the spientifi display

upon the common, and passed the thousands of intelligent, courteous, healthy-looking, neatly attired

Misses Stebbins exhibited a great variety of artifarmers' wives and daughters, who througed our eles, but none more skillfully wrought than two otatreets that day, would have been fully satisfied that tomans. We cannot omit to mention the pleasure mmense quantities of the richest cheese and sweetest butter the world over, were annually manufac-drawing and painting exhibited by Masters John and Larkin Mead of this village; they indicated great MAPLE Scoan .- The exhibition of this article taste and a talent which if properly cultivated will yet was surpassingly fine-exceeding by far any thing make them eminent in this particular art. In conof the kind we ever before witnessed in the Coun- clusion, we cannot full to notice a purse and sunty. The improvements which have been made in dry small boxes wrought by Miss Newton of Newthe manufacture of this article within a few years fune. We understand this young lady has been have enabled our farmers to produce an article confined to her bed for years, and that the boxes equal to the most highly refined sugars we import were wrought with no other instrument than a penknife.

Vegetables the show was respectable, but yet defi- precisely, on the farm of Capt. Wells, about one cient. Mr Field of Fayetteville, was the only indi- mile north of the village. There was much less comvidual who presented a general variety of garden petition in this department than we expected-but products—such as every farmer and householder of the manner in which the work was done was admit Windham County should be ambitious of growing. Table. There were but four enteries—Mr Caleb It should be remembered that no man can be a good liver without a good garden; and no man can ney, Mr Nath'i Samson and Mr Jacob Estey of this have a good garden without a great variety. We town. Mr Estey, after ploughing a few furrows noticed some garden regetables from the garden of finding his team too light, withdrew-leaving only Mr Benzil Boyd, of Wilmington, of extraordinary three competitors. One fourth of an acre was al growth; also a pumpkin of mammoth size, grown lotted to each team and two hours for the perform by Dr Tucker, of Mariboro. But we were partie- ance, reference being had rather to the excellence ularly pleased with the specimens of white and pur-ple Egg plants exhibited by Mr John Burnham of drivers were allowed. The ploughmen entered this village. This is one of the most profitable with a hearty good will upon their work, and it vegetables grown in the market gardens of our cities. Sliced and properly fried with ham, it is deli- ploughmen were familiar with their business. Gee cious. It is easily grown, requiring no extraordi- up! and Gee O! were the words,-steady, true, nary cultivation; and we hope this notice will in- and strong, moved the teams, and their progress growth. The vegetables were good, but had the throng about them. The work was all beautifully eason not been so uncomonly dry, better ones done up within the allotted time, and all agreed that would unquestionably have been exhibited. In the finer specimens of ploughing had never before department of fruits the exhibition exceeded our been witnessed. As soon as the ploughing mutch expectations, and must have satisfied the most in- closed, the immense crowd quietly dispersed an d the

Second Day.

At 10 o'clock the second day, the society a seen aball be able to furnish an extended notice of the of the several committees were read. Of certain crops, the quantities grown, seemed to us utterly incredible; but we understand that in every case hibition of these articles was exceedingly meagre: the proof furnished by the successful competitors we saw however in this department, a Cultivator was perfectly conclusive. To Mr Chester A dams made by Mr Bemis, of this village, which we re- of Mariboro, was awarded the first premiur a on garded as a great improvement, and well worthy of grass—he satisfied the committee that he had gathtrial by our farmers; also a Corn Sheller, presented ered the past summer by one cutting from five by Mr Haynes, of Wilmington. The harrows pre- acres, 23 tons and 800 lbs of well cured En glish ented by Mr Bemis are an imitation of the Eog- hay, and from one acre he cut 6 tons. This great lish square harrows, and are said to be superior to crop we learn was produced by top dressing and l irrigation. Five acres of corn were entered from d iffer-Manuractures.-The display of Manufactures ent towns in the county-the aggregate product of was very respectable—not so great indeed as could which was 615 bushels, the average to the actre b

Five acres of wheat were entered, whose taggre gate product was 184 bushels-averaging about 36 bushels to the acre. It is worthy of remark that much of this wheat, and if we mistake not 3 acres of it were raised upon land where premium crops We noticed however, a beautiful specimen of of corn were grown last year, showing conclus ively

The premium on rye was awarded to Col. Hyde of Bellows Falls, who raised 100 bushels from 4 acres. Mr Tufts of Wardshore, took the prennium again on Barley, and Mr Rugg of Wilmington, took the first premium on oats. The report of the committee on grain was highly interesting, and it would gratify us exceedingly if we could shed with the statements of the successful competions for premiums on grain : we would give them publicity hereafter. We were gratified to learn that manure—the basis of all good farming—is by no mesns overlooked. The composting of sw amp muck we learn is engaging the attention of a large number of our farmers, and we find their efforts are attended with the happiest results. In the language of the committee we can say that the farmers are beginning to learn the truth of the old proverb, that " Muck is the mother of money,"

" Mork is the mither of the meal Kist." After the conclusion of the several reports the so to be regretted as the amount of the premiums ciety proceeded to the Congregational church where awarded for manufactures fell far short of the re- an address was delivered by the Hon. Jacon Cot. sources of the committee. Among the articles not LAMER of Woodstock. As we understand the admentioned in the report of the committee, we notice dress is to be published, we will not attempt any ed two superior melodeons from the factory of description. In the minds of all who heard it (as Messra S. H. Jones & Co.; two viols, a bass and far as our knowledge extends) it greatly incre used double bass, made by Woodbury & Burdits, which the stready brilliant reputation of the speaker, as a were of course worthy of premiums; some beau- scholar, an orator, and a man of extraord many tiful specimens of ivory and box wood rules from common sense. At the conclusion of the adthe shop of E. A. Stearns & Co.; a case of mur- dress, the society proceeded to Wantast iques derous looking pistols presented by S. Pike; a high. Hall and partook of a sumptious farmer's dir mer,

We should be gratified to add sundry notice as of many interesting matters which passed under our Salisbury's best style; and some elegant hats made observation during the several exhibitions and exerby Wm. Hyde. All these were the work of citizens cises, but the limits we have allotted to ours sives of this village, and certainly reflected great honor forbid. In conclusion, we cannot avoid cong ratuupon our industrious mechanics. We were much lating our readers on the triumphant success of the struck with the beauty and finish of a case of har- Agricultural Society thus far, and the prospect of ness trimmings manufactured by Mr Erustus A. its long continued usefulness. Prosecution of the War against Mexico.

A letter from Washington to the New York Her. ald says:--The new Christian warfare pursued in Mexico a found too productionally expensive—the Mexican classing five prices for every thing, and still refound it treat for peace. Father Ritchie, therefore, recommends the old system of plunder, and quoirs Vattel as

authority.

We understand that orders have gone to the army to We understand that orders have gone to the army a begin the foraging upon the enemy forthwith, in the hope that this will bring them to terms. General Jesup carries the order. We approve the proceeding a decidedly more humane in the long run, than that of furnishing the enemy, as we go into his constry, sup the sinews of war. We must either adopt the fireging system or the tallico shift currency, because the long purse of Uncle Sam is getting "nighty long and sline in the waist."

The official paper of Tuesday night corroborates the

The official paper of I westay night corroborars the above. The administration is beginning to count up the enormous cost of this strange and unprofitable was. The Union says:—

There can no longer be a question, that the refuse of the Mexican government to accept our propositions for peace, instead of relaxing our own measures, and attinuable our prospringment to a more vice-union of the strain of the st stimulate our government to a more vigorous p tion of the war. We must bring its pressure h the people of Mexico. We must make then stimulate our government to a more vigorous praces-tion of the war. We must bring its pressure hime to the people of Mexico. We must make them feel the evils of the war more strongly, in order that they may appeal to their own government for peace. It cannot be denied nor concealed, that new energy is to be in-fused into our operations; and the strength of the na-tional arm is to be put forth more efficiently than ever-"Instead of the pillage of the country and defection places, a custom has been substituted (say Vutic) more humane and more advantageous to the soverega making war. I mean that of contributions. Where-

4 00 country. In another article the Union has the following

Major Gen. Jesup, Quartermaster General, left the city this morning for the frontier of Mexico, to take upon himself the general direction of his affairs in that quarter. This step has been taken with a view to provide for every exigency without delay and inconvenience, which sometimes result from waiting instructions from Washington, and in order to secure the ulmost efficiency and economy to the measures of that department.

most efficiency and economy to the measures of that department.

We have no doubt that this movement, deliberately and duly taken, will contribute essentially both in the efficiency and economy of the war.

We understand, also, that before General Jesop left Washington, he had recently purchased two more ricellent sicamboats, on very moderate terms, for the efficiency of the Rio Grande, in order to save the high freights which were demanded for the transportation of the granded of the transportation of the superintent and the same of the save the high adopted, which will save much expense, and contribute most effectually to the transportation of the necessity means for our army.

IF The sincerity of the leaders of the Liberty Party my he inferred from the fact that they have put in nomination a candidate (Gen. A. Howe) for Congress in opposition John Quincy Adams What are we to think of these net Pray, has not John Quicey Adams enough of the pine-

So in this District, Mr Hudson has done in and out of 4 00 Congress, more efficient service against the Southern den-ocratic principles which govern this country, than the 2 00 whole Liberty Party combined; and yet they appear his re-election. Will not people consider this matter?

Warconter Ego-

among other facts for free traders, that "tree Annes in the little sity of Providence, sold more Indian corn at autim. tast year, then was experted to all foreign countries together and, notwithstanding the increased demand cafailure of the potatoe crop, and the acquisition of a ner class of foreign consumers, who have not hitherto been at quainted with the article, our schole expurte, for this year do not equal the amount schick has been imported into its city alone, not taking into the account the considerable sopplies which are received from our own state, and from silver parts of the interior."

Unros .- The Whige and Democratic Tariff men of the 12th district of Pennsylvania have united upon a candidate in opposition to Mr. Wilmot, the present incumhent, and the only Pennsylvania Representative who voted for the

WATER CURE AT NORTHARPTON.-We lears from a pondent of the Springfield Republican, that a large sale of Ersi Estate has been made in Northampton the present week. The whole of the Round Hill Estate, formerly occupied by Mesra whole of the Round Hill Estate, formerly occupied by Meson Coggawoli and Bancroft, for the Round Hill School, has been sold to Samuel Whitmersh, Esq. and others, for a Water Cate sould be stablishment. It is suit that the intention of the parthenent to make it the best, and most extensive establishment of the hind as the world. E. E. Demiston, M. D., a regularly solution of physicians, and a shallful man in his profession, is to last charge of the establishment.

Wesstan's Dictionany .- We learn from the Springfield Be-G. & C. Marriman, of that town, are about getting out a see edition of several thousand words, and the whole carefully retied, under the supervision of Protessor Chauncey A. Goodrich of Yale College.

By The Whig Convention in Franklin County for the item tes for the State Senate, is to be held at Gre field on the 22d mat

LADYEN' BUNKERS—A committee of the Eases county, New Jersey Fair, has recommended to a favorable notice a certain led dis Rubber Ladies Brutle, a new invention, inhening is asker the double purpose of as article of dress and a Life Preservity and they pronounce the affair in their opinion worthy of a 60

Honer Stoles.—We learn from the Keene Philanthrops that Mr Wm. Kingsbury, of Surry, and his horse title Mike Re-ker) stolen from his stable on Tocaday evening last. The the sery stolen from his stable on Touslay evening issu-is supposed to be known, being a transient person by the una-of flates, who had been stopping in the origidarheed for a fer-days past, where he left an old horse of little value. The third-has been pursoed, but his paraners were everal hours behind. The horse was seen, as we learn, in Asbby, Mass, on Wednesday morning. The flaker was a valuable horse, and having been so well known, will be readily recognized by many pursons at a dis-tance.

Lance Arraga -Mr Chester Franch of this town, brought into our office one day last week, two of the largest apples to have seen this year,—the largest one measuring 13 3-4 inches in circumference, and weighing 16 1-2 onices.

To Namesaren Readens .- Stop ! Consider ! Redect upon what you are doing! are you a borcower or a grab-ber!
